 OraclE9i: It's all about the data - The upcoming release of Oracle 's flagship product is more Web-savvy and goes a long way toward easing management...
...   s most popular databases for E-business was no mean feat.
     A key obstacle that Oracle had to contend with was the increasing interrelationship between the database and a growing number of back- office and Web applications. Oracle decided that its product strategy was due for a bit of refocusing, product-line contraction...

...are availability, scalability, performance, and manageability, although IT managers won't really know how fully Oracle meets these objectives until the the new version of the database actually ships in the...

...you're choosing best-of-breed products from multiple vendors or simply selecting from among Oracle 's 75-plus products. One of the tasks Oracle set for itself with 9i was to simplify its database product line to two major components: the Oracle9i database and the Oracle9i Application Server. Oracle wanted to reduce implementation complexity by offering an application server, E- business applications, and tools...

...high dividends for IT managers.
     Oracle9i AS is a suite of applications centering on its Oracle Application Server and the Oracle HTTP Server, which is based on the popular Apache Server. The application server manages the traffic between Web browsers and the back-end database.
     Oracle9i AS combines almost all of Oracle 's database-related applications and utilities, including its middleware, caching technologies, and business- intelligence products, into a single, centrally managed system. Oracle Portal, also included, lets developers more easily bring external data, content, and functionality to Web-based portal applications.
     Along with the Oracle Internet Developer's Suite, Oracle plans to provide everything necessary to build, deploy, and manage Internet applications. Aside from obvious profit motives, Oracle wants to control some of the confounding variables associated with piecing together E-business products from multiple vendors.
     One aspect of Oracle 's drive to reduce complexity is its disclosure that it will be working with a limited number of hardware vendors to offer certified, preconfigured products. Oracle says that its customers would welcome the opportunity to buy a complete product and thus
...

...EMC, Hewlett-Packard, and Sun Microsystems were identified as initial

targets to offer preinstalled software. Oracle is pushing what could be a standard, co-marketing agreement several steps further by letting...

...switchback.

     If demos are any indication of how finished products are going to perform, the Oracle OpenWorld demo of Oracle9i's Cache Fusion feature could well provide something approaching linear performance with its database clustering capability. Oracle 's cache technology works by replicating Web-site information stored in databases, storing frequently accessed...

...disks for each request, Web-page access for the user is much quicker. Due to Oracle 's software caching architecture, applications won't have to be rewritten to be cluster- aware to scale effectively.

     Unlike the previous version of Oracle 's caching technology, Oracle9i's Cache Fusion technology also handles dynamic Web content and works...

...as a single logical entity. Configuration, backup, upgrade, and monitoring functions are performed once, and Oracle distributes management functions to appropriate nodes.

     The caching architecture takes advantage of all of the...

...or when an update transaction performs a commit operation that requires a disk write.

     However, Oracle advises that not all applications are appropriate for this iteration of its clustered architecture; in...can summarize, precompute, replicate, and distribute data-can be created. These capabilities speed up reporting.

     Oracle paid particular attention to maintenance and reorganization tasks that required that the database be re...

...at the beginning and during the updates to the data dictionary.

     The coming version of Oracle lets the buffer cache and shared-memory pool be resized dynamically. This makes incorrect second...

...allow recovery on the failed state. For multinode systems, faster failure detection and reconfiguration for Oracle   Parallel Server reduce potential downtime due to system faults. Oracle   Fail Safe for Windows has been enhanced to support cluster configurations when multiple databases on...

...improvements in Oracle9i focus on improving database performance with respect to E-business application scenarios. Oracle   Cache Fusion affects business-to-consumer scenarios when vast numbers of page reads are a factor. Oracle addresses application inactivity through support for native compilation and improved optimization of Procedural Language/ SQL. Data warehouse and online transactional processing environments are ...

...I/O and skip-scan row source operations on indexes.

     Improved Java garbage collection, better native   compilation , increased object sharing, and session pinning have improved internal Java application performance. Java Database Connectivity...

...of the messaging burden off the CPU and onto high-speed network hardware. According to Oracle , CPU use for network communication is reduced by more than 60% on servers and clients...

...a unified event/wait model improve client-server communication throughput by as much as 20%, Oracle says.

     Finally, Oracle9i supports Lightweight Directory Access Protocol technology to centrally manage network naming. Microsoft Active Directory, Novell Directory Services, and Oracle Internet Directory are now

supported. Interdatabase communication via the Oracle Call Interface has improved as well, with improved distributed query optimization built into the optimizer.

Certainly, simplifying the often confusing array of Oracle applications and utilities into a cou-ple of meta products makes it more likely to...

...confounding variables should resonate with many IT departments.

...   source code.
      SQLJ was designed by a group of experts including team members from
IBM, Oracle , Sun and Tandem. Like JDBC, SQLJ has been adopted by all the
major database vendors...done using the VisualAge for Java Enterprise
Toolkit for OS/390 (ET/390).
      ET/390 native compilation provides a number of benefits to Java
programs running on OS/390, including improved performance...
